PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience operating Azure cloud infrastructure and Kubernetes platforms in enterprise environments. Specialized in CI/CD automation, GitOps deployments, AKS cluster operations, and cloud security integration. Proven ability to manage non-production environments, maintain shared platform services, and collaborate with engineering teams to improve deployment reliability and platform stability. Open to roles across banking, product, and technology-driven organizations.

EXPERIENCE

Siam Commercial Bank (SCB) – DevOps Engineer

Jan 2024 – Present

- Managed and maintained Azure non-production environments, ensuring stable, secure, and reproducible infrastructure for development and testing teams.
- Designed and implemented Jenkins CI/CD pipelines, automating build, test, and deployment workflows to reduce manual intervention and deployment errors.
- Implemented GitOps-based deployments using ArgoCD, enabling consistent application delivery and simplified rollback across Kubernetes environments.
- Operated and administered Azure Kubernetes Service (AKS) clusters, including:
 - Performing AKS version upgrades to maintain platform security and compatibility
 - Upgrading and managing NGINX Ingress Controller versions
 - Managing Kubernetes workloads, deployments, and resource utilization
 - Integrated Azure Key Vault with AKS using CSI Driver, enabling secure, secretless application configuration and improved credential management.
- Maintained a centralized Apache Airflow service in non-production environments to support shared data and workflow orchestration use cases.
- Provisioned and maintained cloud infrastructure using Terraform, ensuring infrastructure-as-code, version control, and repeatable deployments.
- Developed and enforced Open Policy Agent (OPA) policies using Rego to automate security and compliance checks within CI/CD pipelines.
- Worked closely with developers and technical leads to design CI/CD and platform architectures aligned with SDLC best practices.

Technologies: Azure, AKS, ACR, Application Gateway, Terraform, Jenkins, ArgoCD, Kubernetes, NGINX Ingress, OPA, Rego, Airflow, Azure Key Vault, Managed Identity

Sofaboy Cleaning and Maintenance Co., Ltd. – Business Systems Developer

Nov 2019 – Oct 2022

- Built internal automation systems using Google Apps Script and Google Sheets, reducing manual operational effort by ~60%.
- Developed lightweight internal tools for job tracking, scheduling, and payroll automation.
- Designed scalable internal workflows that supported business growth to ~400,000 THB/month revenue.

Accenture – Technology Consulting Analyst

Jun 2018 – Sep 2019

- Developed a Robotic Process Automation (RPA) solution using Kapow to automate corporate banking payment operations.

- Automated inward/outward remittance and domestic transfer workflows, reducing back-office processing effort by ~40%.
- Collaborated with business and technical stakeholders to analyze processes and deliver scalable automation solutions.

Technologies: RPA (Kapow), Process Automation, Banking Systems

EDUCATION

MSc in Robotics, University of Bristol

Sep 2022 – Sep 2023 – **With Distinction**

BEng in Automotive Design & Manufacturing, Chulalongkorn University

Sep 2014 – May 2018

- GPA: **3.75**
-

TECHNICAL SKILLS

Cloud Platforms: Microsoft Azure

Container & Orchestration: Kubernetes, AKS, NGINX Ingress

CI/CD & GitOps: Jenkins, ArgoCD, CI/CD Pipelines

Infrastructure as Code: Terraform

Security & Identity: Azure Key Vault, Managed Identity, OPA, Rego

DevOps Tooling: ACR, Application Gateway, Airflow

General: Cloud Architecture, Automation, Platform Operations
